Alarm Center® Graphical Aid Module

SIGNAL PROCESSING

Automatically alert an operator with graphical aid upon receiving an alarm signal.
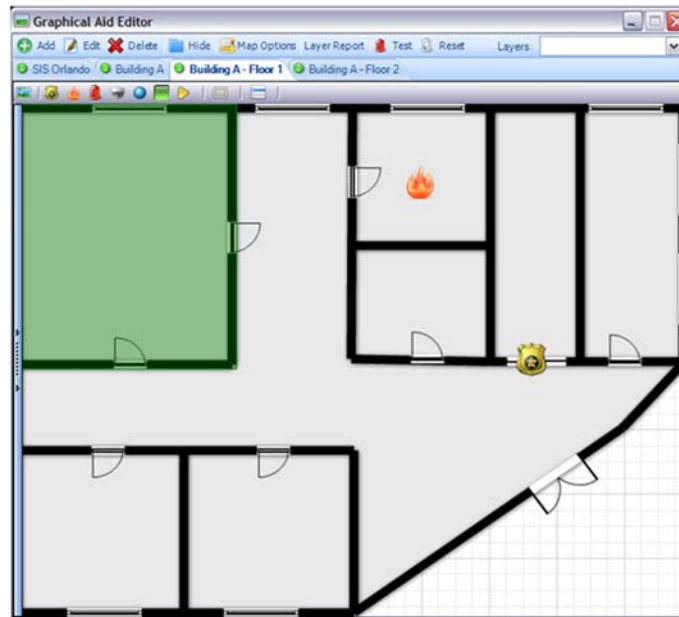

SYSTEM LAYERS

Program layers to represent account location such as exterior property, buildings, and floor plans. Predefined icons, custom icons, and zone regions are used to define zone locations.

REPORT FEATURE

Layer reports provide an overview of each layer and zones list.

The Alarm Center® Graphical Aid Module "GAM" is used to graphically represent a location's blueprint by allowing users to diagram their location with images, specify zones locations, and receive zone alarm alerts with animated images.

The GAM layer above illustrates a floor plan with zone icons and a zone region, each layer is fully customizable with multiple zone icons and regions.
